

SECTION 2: PYTHON SETUP / 54 mins, 5 parts

- 5/5 Git and GitHub Overview (Optional)

- -> git
- -> a version control system
 - -> this can handle different project sizes
 - -> **there is a site called try git**
 - -> most major companies use git
- -> git vs github
 - -> **github** <- for publishing repos and sharing them with other people
 - -> you can check different versions of the code and see when they were published
 - -> **git**
 - -> a type of file / gits -> which you can host on DropBox
 - -> **github guides** -> **there is documentation online**
 - -> **git immersion.com**
- -> you can create your own libraries etc
